Bay Lake Points of Reference Map

-Neighborhoods (i.e. developments, roads, associations, etc) are in black.

-Bays, points and narrows are in blue.

-Businesses are in red.

Note: There is nothing ***"official"*** about some of the names on this map. Some have been used because they have historical significance. Others because they are commonly known by some of our existing residents. Still others because that's what the residents on that point or shoreline requested and/or used for their Shoreline History Project.

The only objective is to have a workable map for those who want to use it.
