

Yet More High Water - 2011

*2" plus 4" plus another 2"
equals overflowing rain
gauges, record water levels
.....and trouble!*

Is your dock about to float away?

Are boat wakes eroding your shoreline?

*Are you starting to hate your neighbor's
boat?*

*Water is flowing over the dam and the stream to Tame Fish Lake looks
like a river so it will take time before the lake level goes back down.*

*Persistent high water is a problem and some lakes
have already been designated "No Wake".*

*Bay Lake is a community. This is a time when
your neighbors deserve some extra courtesy.*

***Please minimize your wake
...particularly near shore.***
