

High Water - 2011

Is your dock about to float away? Does your pontoon seem taller or your boat lift seem shorter?

A 70 plus year BayLaker says the lake is as high as he has ever seen...so it's a record!

Water is flowing over the dam, the stream to Tame Fish Lake looks like a river and the inlet from Maple Lake appears to be threatening a bridge.

It will go back down, but in the meantime please minimize your wake.
